

EDUCATION NEWS & DEVELOPMENTS

We are always looking for ways to deepen our understanding and knowledge about the issues that are important to us, our grantees, and our community. That's why it's exciting to see an increasing focus on data to drive local decision making. It is shaping more strategic philanthropic decisions, influencing how and where to deploy community resources, and shining a light on how to replicate and scale educational best practices. Using data to drive change will help us better leverage our resources as a community, lift up what works, and maximize our collective impact.

What Makes SEL Work?

An effective social-emotional learning program should be a whole-school initiative.
